# INTELLIGENT STREETLIGHT LUX MAPPING SYSTEM PLUS

Efficiency, Safety, Cost Saving

Designed in compliance to international standards, is a state-of-the-art streetlight lux mapping system for assessing the quality and performance of lighting installations.

Delivering a safer environment for vehicle and pedestrian traffic, and eliminating the risk of exposure to oncoming vehicles while taking measurements.

Equipped with user-friendly software, provides a range of graphical and numerical reports of interest.

Comes with high sensitive digital sensors, high performance GPS module, in-vehicle console and optional HD video camera.

Versatile application with flexible mounting options for manpack, motorbike, or vehicle, suitable for driving speeds up to 100 km/h.
